

Jordan Setbon | Android Developer & Tech Lead

+972-587845210 | jordy.setbon@gmail.com | [LinkedIn](#)

Summary

Innovative Android Developer with 3+ years of experience building and scaling B2C mobile applications. Expert in Kotlin and Jetpack Compose, with deep expertise in modern Android architecture (MVVM, Clean Architecture). **Early adopter of AI-assisted development**, leveraging cutting-edge tools to accelerate feature delivery and code quality. Passionate about crafting exceptional UX and driving fintech innovation across emerging markets.

Experience

Android Developer → Technical Lead - Cellcom, Israel

Dec 2021 - Present

Core Development & Architecture

- Spearheaded the design and implementation of multiple high-impact features for **CellcomTV**, a flagship streaming app serving **100,000+ active users**
- Pioneered the **complete UI modernization** using Jetpack Compose, dramatically improving development velocity and achieving pixel-perfect visual consistency across the app
- Architected robust state management with **StateFlow and Coroutines**, delivering seamless responsiveness and reducing crash rates by over 40%
- Championed **MVVM and Clean Architecture** principles, establishing scalable patterns adopted across the entire development team
- Optimized app performance through deep profiling, **reducing startup time by 30%** and significantly improving user retention metrics
- Collaborated with backend teams to integrate RESTful APIs with sophisticated error handling for low-connectivity scenarios

AI-Powered Development & Innovation

- **Fully integrated AI-assisted development** into daily workflow, leveraging tools like GitHub Copilot, ChatGPT, and Cursor to:
 - Accelerate feature implementation and reduce boilerplate code by 50%
 - Generate comprehensive unit tests and catch edge cases earlier
 - Quickly prototype complex UI components and animations
 - Debug production issues faster with AI-powered code analysis
- Continuously evolved development practices, staying ahead of emerging AI tools and sharing best practices with the team

Leadership & Team Management

- **Took full ownership of the Play Store release cycle**, managing:
 - Internal testing tracks and alpha releases
 - Phased production rollouts with real-time monitoring
 - Emergency hotfix deployments and versioning strategy
- **Led PR reviews for the entire development team**, ensuring code quality, architecture consistency, and knowledge sharing
- **Mentored and trained junior developers**, creating comprehensive onboarding materials and conducting regular 1-on-1 technical coaching sessions
- Facilitated cross-functional collaboration with Product Managers and Designers to translate business requirements into intuitive user experiences

Key Achievements

- Delivered 15+ major features with 99.5% crash-free rate
 - Reduced code review turnaround time by 60% through structured processes
 - Built a culture of continuous learning and AI adoption within the team
-

SEO & CMS Developer - Promoking

Feb 2021 - Dec 2021

- Created intelligent automation tools for SEO workflows, improving content optimization efficiency
-

Freelance Android Developer - CurrencyPro

Dec 2019 - Feb 2020

- Built and published a fintech app from scratch using **Kotlin** and banking APIs
 - Gained firsthand experience in financial services and payment processing
-

Technical Skills

Languages & Frameworks

Kotlin • Java • Jetpack Compose • Coroutines • StateFlow • Kotlin Multiplatform

Architecture & Patterns

MVVM • Clean Architecture • Repository Pattern • Dependency Injection (Hilt/Koin)

Tools & Platforms

Android Studio • Git/GitHub • Google Play Console • Firebase • RESTful APIs • CI/CD

AI & Productivity

GitHub Copilot • ChatGPT/Claude • AI-assisted debugging • Cursor • Prompt engineering

Release Management

Play Store optimization • Internal/Alpha/Beta testing • Phased rollouts • Crash analytics

Education & Languages

B.Sc. in Computer Science - Ariel University (2016 - 2018)

Languages: French (Native) • English (Proficient) • Hebrew (Proficient)

Why Choose Me

- **Battle-Tested Expertise:** 3+ years building production Android apps with Kotlin, Jetpack Compose, and modern architecture patterns that scale
 - **Proven Impact:** Delivered critical features for a 100K+ user app, slashed startup time by 30%, and drove crash rates down by 40%
 - **AI-First Developer:** Early adopter who fully integrated AI tools into the development workflow, boosting productivity and code quality while staying ahead of industry trends
 - **Leadership Experience:** Managed complete Play Store release cycles, led PR reviews across the team, and successfully trained junior developers to become productive contributors
 - **Fintech-Driven:** Deep passion for financial inclusion and eager to leverage technical skills to expand access to financial services
 - **Collaborative & Growth-Minded:** Thrives in cross-functional teams, mentors others naturally, and continuously adapts to emerging technologies like Kotlin Multiplatform
 - **Results-Oriented:** Combines technical excellence with business impact—every line of code serves user needs and company goals
-

Let's Connect

I'm excited about opportunities to leverage my technical leadership, AI-powered development approach, and passion for fintech to make a meaningful impact. Let's discuss how I can contribute to your team's success!
